2022 IIAG Framework

Published since 2007, the Ibrahim Index of African Governance (IIAG) assesses governance performance in 54 African countries over the latest available 10-year period. The Mo Ibrahim Foundation defines governance as the provision of the political, social, economic and environmental public goods that every citizen has the right to expect from their state, and that a state has the responsibility to deliver to its citizens.

The 2022 IIAG covers ten years from 2012 to 2021. The data for the IIAG come from 47 sources, from which 265 variables, clustered into 81 indicators, are collected. All but four IIAG indicators are formed of more than one variable to provide a governance assessment supported by multiple proxy measurements.

The IIAG indicators are organised under 16 sub-categories and four categories - *Security & Rule of Law; Participation, Rights & Inclusion; Foundations for Economic Opportunity; Human Development* - that make up the *Overall Governance* score.

Including all the data from source as well as the composite scores calculated expressly for the IIAG, there are a total of 413 different measures of governance for any given country or group in any given data year across the ten years covered. These are made up of indicators that measure specific issues, such as *Executive Compliance with the Rule of Law*, which sits within the broader sub-category measure *Rule of Law & Justice*, which in turn is one part of the overarching category *Security & Rule of Law*. In total there are more than 220,000 data points in the 2022 IIAG dataset.

As citizens are the end recipients of public leadership and governance, measuring governance performance cannot rely on official and expert assessment data alone. For this reason, the IIAG is accompanied by a complementary dataset focused on Citizens' Voices to provide an assessment of Africa's citizens' perceptions of governance performance, composed of 36 public perception variables sourced from Afrobarometer.

Reading the Results

Scores and ranks

The IIAG scores quantify a country's performance for each governance measure each data year, expressed out of 100.0 (with 100.0 being always the best score). Rounded to one decimal point, scores are relative to each country's performance in relation to the other 54 African countries.

Ranks are calculated based on the respective scores and are expressed out of 54. When two or more countries have the same score, they share the same place in the ranking table (tied ranks).

10-year trends

The IIAG 10-year trends offer an additional layer of analysis to scores and ranks, as they quantify change in absolute score between the last and the first data years of the time series. The 2022 IIAG 10-year trends compare a country's performance for each governance measure in 2021 compared to 2012, offering an assessment of the change.

Trend classifications

Trend classifications are a third layer of analysis, complementing scores, ranks and 10-year trends. The IIAG trend classifications serve to assess the mid-period trend (2017-2021 in the 2022 IIAG) in relation to the 10-year trend (2012-2021). The comparison of mid-period and full period trends help identify early signs of the direction and pace of country trajectories - 'trends within trends'.

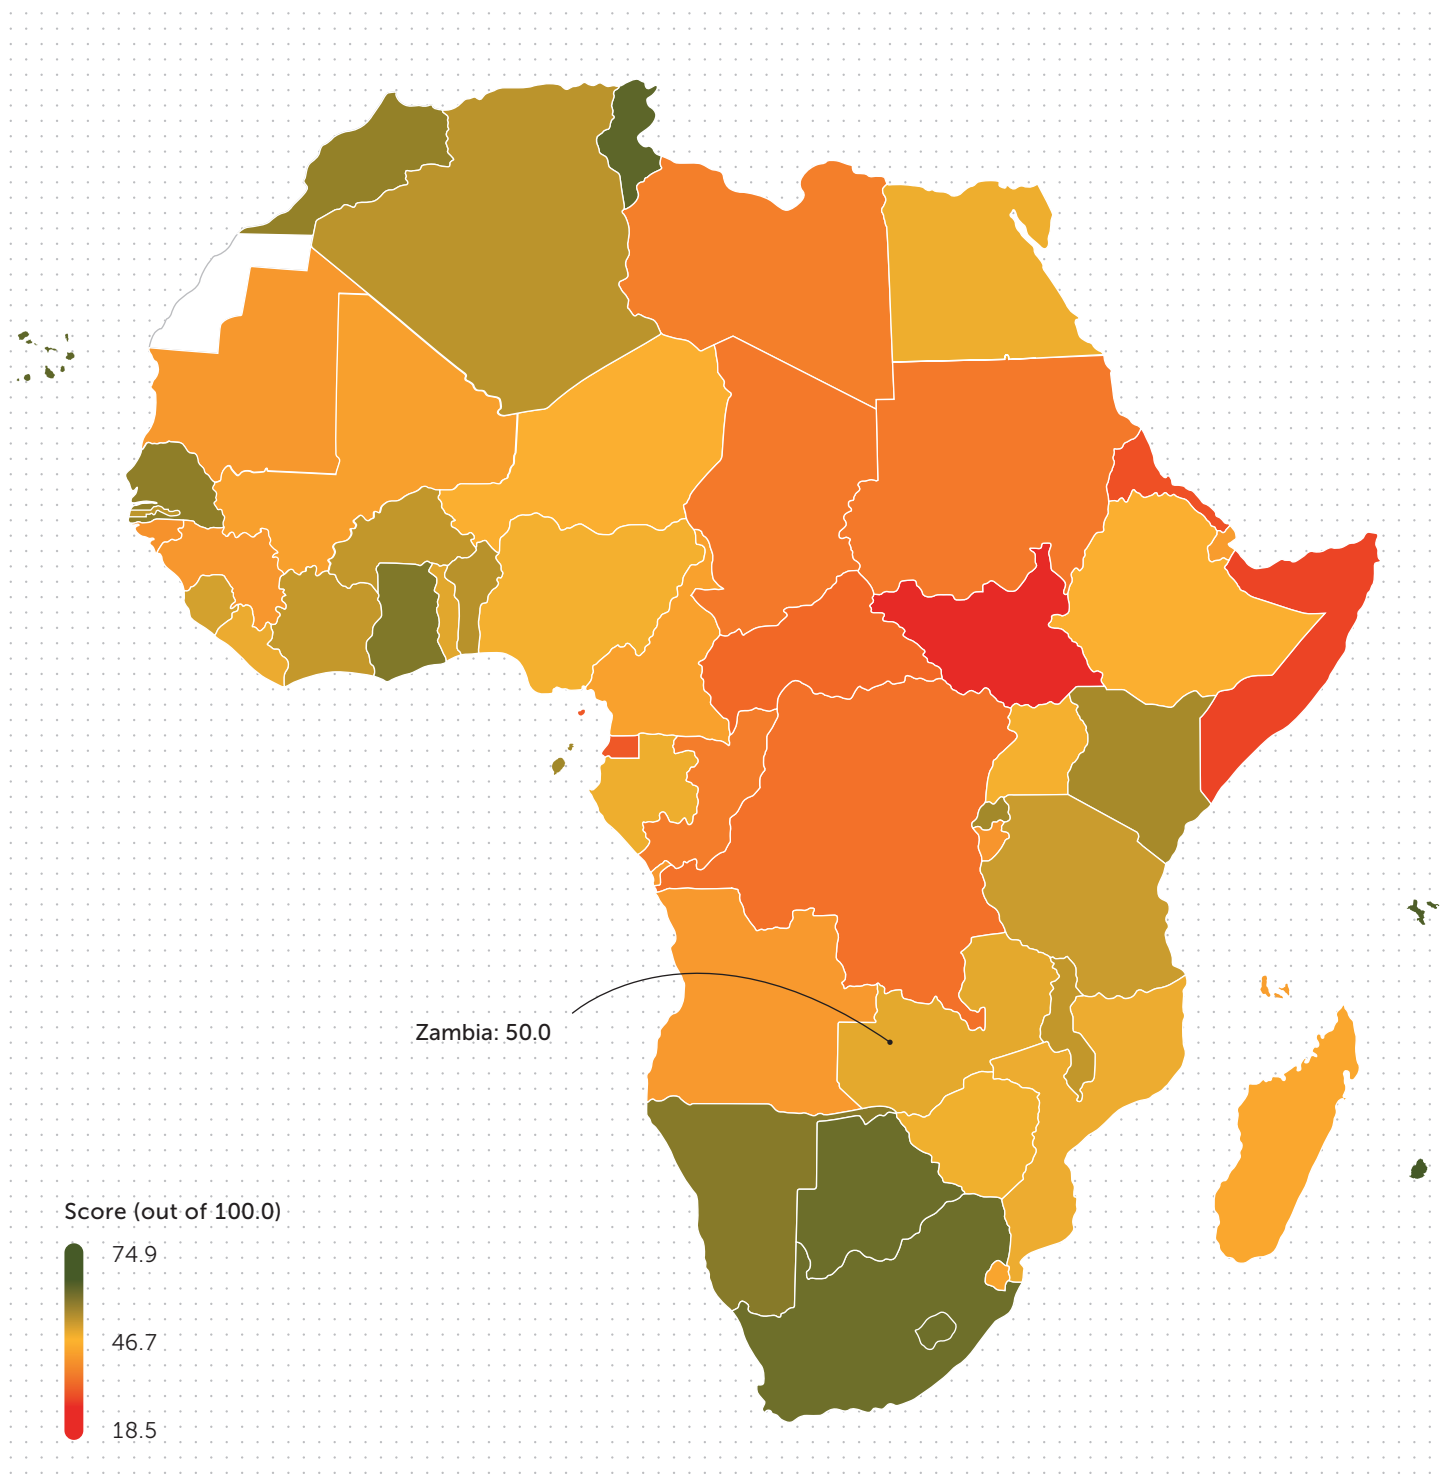

Trend Classification	Characteristic
Increasing Improvement	Score is better in 2021 compared to 2012, with the rate of improvement increasing since 2017
Slowing Improvement	Score is better in 2021 compared to 2012, but the rate of improvement is slowing since 2017
Warning Signs	Score is better/no change in 2021 compared to 2012, but showing decline since 2017
Bouncing Back	Score is worse/no change in 2021 compared to 2012, but showing progress since 2017
Slowing Deterioration	Score is worse in 2021 compared to 2012, but the rate of deterioration is slowing since 2017
Increasing Deterioration	Score is worse in 2021 compared to 2012, with the rate of deterioration increasing since 2017

Citizens' Voices: Scores & Trends

Citizens' Voices (CV) acts as a parallel index that complements the IAG results with citizens' perceptions and satisfaction with public services. CV mirrors the IAG categories and provides public perception data on the closest proxies to the IAG measures.

In Zambia, citizens' satisfaction with governance has deteriorated since 2012, with declines registered across all four sub-sections. The biggest decline was registered in the *Public Perception of Security & Rule of Law* sub-section, with dissatisfaction growing in all indicators.
